T2.3 Terms of Reference

TERMS OF REFERENCE

APPOINTMENT OF A PROFESSIONAL SERVICE PROVIDER TO PROVIDE ENVIRONMENTAL MANAGEMENT SERVICES FOR THE ALIEN VEGETATION CLEARANCE WITHIN INKOMATI USUTHU WATER MANAGEMENT AREA FOR A PERIOD OF TWENTY-FOUR (24) MONTHS

1. INTRODUCTION

The IUCMA is the water resource management authority established in terms of Section 78 of the National Water Act (Act 36 of 1998) (NWA), to perform water resource management at local level within the WMA. The management of the resources entails protection, use, development, conservation, management, and control of water resources within the WMA as contemplated in the National Water Act (Act 36 of 1998). The IUCMA is also responsible for local water resources planning and operation of water resources within Water Management Area. However, the WMA suffers from water demand exceeding available water sources. Thus, to meet the growing demand and ensure water security, all possible interventions must be explored to ensure the achievement of the IUCMA vision.

1.1 BACKGROUND

Water Resource Analysis studies conducted in the WMA revealed that there are inadequate water resources to supply existing water users, including the environmental water requirement releases. Therefore, future continual supply and development of the resource is at risk due to an increase in the demand for water to satisfy forestry, agricultural expansion, and population growth.

Alien invasive plants are one of the identified risks within the WMA. They threaten the aquatic system's ability to maintain a crucial integral component in the landscape. Therefore, the sustenance and maintenance of economic activities including climate resilience is at risk. The removal of invading alien plants in the river systems (Sabie, Crocodile and Komati rivers) can substantially improve the hydrology (runoff and inflows into dams) of the catchments. It must be cautioned that the removal may not necessarily result in increased yield of the system, but assurance of supply for run-off river users will increase.

Invasive alien plants in the Sabie River Catchment, were identified as the highest risk on the hydrology due to the estimated 1.1 – 5.0 % reduction in Mean Annual Runoff (MAR) and should be prioritised.

The work is done in support of the Department of Forestry, Fisheries and Environmental (DFFE) call for Natural Resources Management Programmes. The Natural Resources Management Programme aim to address the threats to the productive use of land and water, and the functioning of natural systems by invasive alien species, wild fires and land degradation, as well as the opportunities for value added industries (including fibre and furniture production), whilst ensuring meaningful livelihood opportunities are supported for those employed in doing this work within the environmental sector public employment programmes through the Environmental Programmes (EP) Branch participation in the government's Expanded Public Works Programme (EPWP). IUCMA therefore is supporting DFFE in implementing Working for Water Programme while aiming to enhance water resources assurance of supply for the water users.

2. AIMS AND OBJECTIVES

2.1 AIMS

The aim of this project is to achieve the following:

- I. Restore ecological integrity and promote water security through the control of invasive alien plants.

IUCMA seeks the services of Contractor to undertake the invasive alien plants clearance in areas identified by IUCMA by a suitably qualified Contractor.

2.2 OBJECTIVES

The objectives developed to ensure the achievement of the aims above are as follows:

- I. Holistic approach into invasive alien plants clearing through incorporating research into practice and vice versa.
- II. Improve assurance of supply for beneficial uptake downstream while reducing wastage from alien invasive abstraction.
- III. Increase socio-ecological and economic impact downstream.
- IV. Provision of employment and capacity development to disadvantaged community members.
- V. Improved climate resilience.

3. PROJECT LOCATION

The following considerations were applied:

- A review of the locations of Invasive Alien Plants (IAPs) as presented in Figure 1 indicates the intervention would be beneficial in the Sabie catchment due to the locations upstream of Inyaka Dam. An estimated 3 million m³/annum could be added to the yield of the dam by removing IAPs.
- The denser distribution of IAPs in the Crocodile catchment are located around tributary and run of river resources.
- The total amount of alien vegetation in the Komati River catchments was estimated at 318 km² or 2.9 % of the total catchment area (DWAF, 2009). The important Nooitgedacht Dam, Vygeboom Dam and Driekoppies Dam catchments have 174 km² of IAP infestation or 55 % of total IAP s.
- The Driekoppies Dam (lower Komati catchment) is the most affected sub-catchment at IAP area 7.8 % of total catchment area. Infestations are significant, i.e. greater than 10 % of catchment area, in a minority of sub-catchments.
- In general, the impact of IAPs on streamflow is negligible but may be locally significant if the proportion in the riparian zone is greater than 10 %. In the Usuthu Catchment, IAP s located close to the natural streams utilise more water purely due to the availability of water and need to be treated separately from the remaining IAPs when determining the reduction in runoff due to IAPs (IUCMA, 2014). IAP area as % of catchment is 3.8%.

NB: The above description provides preliminary information on areas that have been identified as critical. However, the professional service provider will be expected to conduct a review in line with data provided by Department of Forestry, Fisheries and Environmental (DFFE) during project inception stage.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete
